SUMMARY

Frontend Developer with over 10 years of building modern, user-focused web interfaces, recently specializing in React and Next.js. I am dedicated to delivering high-performance, maintainable, and scalable applications that provide seamless user experiences. With strong problem-solving skills, a keen eye for UI/UX, and the ability to collaborate effectively with cross-functional teams, I consistently add value through clean, efficient code. Passionate about frontend technologies, I am committed to continuous learning and growing as a developer, with a clear focus on deepening my technical expertise rather than transitioning into a leadership role.

EDUCATION

- Diploma of Computer Science **Inforworld School** | *2006 -2010*
- Microsoft Certificate of Application Developer (MCAD)
- Ongoing self-learning through official React, Next.js, and TypeScript documentation

TECHNICAL SKILLS

- **Languages**: JavaScript, TypeScript, HTML5, CSS3, SASS
- **Frameworks/Libraries**: React, Next.js, Tailwind CSS, Redux (basic), jQuery, React Hooks, React Context API
- **Tools**: Git, SVN, Vite, Webpack, Babel, Jenkins, Docker, Figma, Zeplin, Jira
- **Testing & Performance:** Chrome DevTools, Lazy Loading, Code Splitting
- **Others**: RESTful APIs, Axios, Prisma, SQL, PostgreSQL, JWT, NextAuth, Responsive Web Design, CI/CD (basic)

WORK EXPERIENCE

Freelancer
Remote   2025 - current

Project: Nông Sản Đức Tài – Product Management Platform

- **Domain:** Agriculture / Product Information Management
- **Team Size:** 1 (Solo Project)
- **Tech Stack:** React, Next.js, Prisma, SQL, TailwindCSS, Axios, NextAuth, Vercel, Git,...
- **Main duties:**
  - Developed a full-stack product management system for internal use, including product CRUD, category management, and QR code generation.
  - Integrated NextAuth.js with JWT to handle authentication and session persistence securely.
  - Built a user-facing interface to view product listings and detailed product pages.
  - Integrated QR code scanning to give customers instant access to product information.
  - Applied SSR and static generation (SSG) for improved performance and SEO.

Project: Personal Portfolio Website

- **Tech Stack:** Next.js, TailwindCSS, Framer Motion, ShadCN, Three.js, Vercel, Git,..
- **Main duties:**
  - Built a personal portfolio showcasing professional experience and projects.
  - Implemented dark mode, scroll animations, and starry background effects.
  - Used Next.js static generation for faster load times and better Lighthouse scores.

Nakivo
Senior Frontend Developer

2021 – 2022

Project: NBR (Nakivo Backup & Replication)

- **Domain:** Backup & Data Protection
- **Team Size:** 30+ members
- **Tech Stack:** ExtJS, Spring Boot, Bootstrap, PostgreSQL, SVN,...
- **Main duties:**
  - Designed and implemented a component-based architecture and a reusable component system, reducing code duplication by 30% and improving maintainability.
  - Developed advanced features: filtering, sorting, pagination, dashboard visualizations.
  - Optimized frontend performance and ensured cross-browser compatibility.
  - Collaborated with backend team to refine API integration and data flow, ensuring seamless communication.

Sprialedge
Frontend Developer

2016 - 2021

Project: Tend Project

- **Domain:** Farm Management SaaS
- **Team Size:** 20+ members
- **Tech Stack:** AngularJS, D3Js, Bootstrap, LESS, Git, WebSocket, OAuth, Jenkins, Bitbucket, Git...
- **Main duties:**
  - Enhanced user engagement through interactive UI elements, leading to a 15% increase in retention.
  - Designed and maintained interactive features—such as map views, crop planning tools, harvest calendars, and dynamic visualizations—to help farmers easily monitor activities, make data-driven decisions, and optimize farm operations.
  - Integrated a subscription-based payment system with 14-day trial support, leading to a 5% increase in Monthly Recurring Revenue (MRR) and higher user engagement through seamless trial-to-paid conversion.
  - Collaborated with backend engineers to optimize API integration and data processing.

S3Corp
Associate Developer

2013 - 2015

Project: Web Application Development

- **Team Size:** 5 - 10 members
- **Tech Stack:** HTML, LESS, Media queries, Javascript, PHP framework, Jquery, AJAX, SVN,..
- **Main duties:**
  - Translated design into high-quality code: Ensured pixel-perfect UI implementation, achieving a customer satisfaction rate of 95%.
  - Optimized CSS for cross-browser compatibility: Ensured 99% compatibility across popular browsers, significantly improving product reliability.
  - Collaborated with cross-functional teams: Worked with designers and developers to define and ship new features, contributing to the successful launch of multiple product versions.

OSS
Website Developer

2010 - 2013

Project: Corporate Websites & CMS

- **Team Size:** 5 - 7 members
- **Tech Stack:** HTML, CSS, Joomla CMS, JavaScript, Bootstrap, Media Queries, SVN,..
- **Main duties:**
  - Developed custom Joomla plugins and templates for diverse clients while building responsive websites with media queries and cross-browser compatibility.
  - Collaborated with backend teams.
